

Introduction

RFID Resolution Team, Inc. is a North Carolina-based LLC formed by RFID industry veterans to address significant gaps in RFID product sets currently required for large scale deployments. The Company's major product line is a family of portals that dramatically improve the reliability and price-performance of supply chain, tag reading infrastructure. RFID Resolution Team' portal products are designed for large scale deployments and dense reader environments. They ship pre-fabricated, pre-wired and pre-configured for simplified, consistent installation and performance. The company has also developed and is productizing test tools and software to aid Integrators and VARs with site survey, installation, commissioning, maintaining and remote monitoring of these portals.

➤ Products

- Adjustable height and width dock door UHF RFID portals,
- Personnel door and ceiling mount UHF RFID systems,
- Shrink wrap station UHF RFID Reader system,
- Conveyor reader systems at UHF and HF,
- Universal I/O sub-system module for all types of readers,
- Commissioning and performance verification software,
- RFID Analyzer tools for verification of readers.

➤ Custom Design

- Fully custom reader and antenna designs at LF, HF, UHF and MW,
- Integrated solutions using OTS components

➤ Consulting

- Site and application surveys,
- Design support,
- Testing, Proof of concepts, Pilots and Evaluations

➤ Training

- On-site or at our facilities
- Standards, Regulations, Theory and Practical hands-on trials and experiments
